24 January 1958

SUBJECT: Spares for 3-Channel Data Reduction Equipment

TO: Contracting Officer

Dear Dan:

Reference your telephone conversation with Bruce Hall on 24 January 1958 in regard to your letter #22670 dated 27 December 1957, same subject as above, which forwarded the Ramo-Wooldridge proposal revising the spares lists for the 3-channel data reduction equipment. In accordance with your letter, the obligation of \$4,713 to Contract No. A-101 to cover increased costs of FOG read-out rack support is approved.

This proposal alone will not bring the 3-channel data reduction spares program up to date. The contractor recommended in his proposal that one FAK be procured for each rack. In accordance with my letters to you dated 14 August 1957 and 7 January 1958, the present FOG requirement for 3-channel read-out racks is:

A	B ₁	B ₂	C	D	E	F
4	4	4	20	13	12	22

As stated in your letter, the break-out of FOG rack FAK requirements is:

A	B	C	E	F
4	4	9	9	23
		20	12	22

If you concur that the above quantities are correct, it is requested that action be initiated to procure one FAK for each FOG rack by increasing or decreasing, as necessary, quantities presently on contract. In addition, request that you bring to the attention of the contractor the comments made by [] in my approval letter to you dated 26 December 1957 for the recommended FAK lists for A, B, C, and F racks and the depot spares lists.

Sincerely,

[Redacted Signature]
